### Healthcare Professionals

Course	Delivery Format	Content / Modules	Features & Benefits	Audience	Written Exam / Skills Session	Card Type / AHA Certification	Estimated Time	CME / CE Credit	Offered in Spanish
Basic Life Support (BLS) for Healthcare Providers	Traditional (Instructor and video)	<ul style="list-style-type: none"> <li>Basic Life Support for Healthcare Providers</li> <li>Adult and pediatric CPR (including 2-rescuer scenarios and use of the bag mask)</li> <li>Foreign-body airway obstruction</li> <li>Use of automated external defibrillation with CPR</li> </ul>	<ul style="list-style-type: none"> <li>This course is designed to teach the skills of CPR for victims of all ages, use of an automated external defibrillator and relief of choking.</li> <li>A student CD, included with the text, contains supplemental information for interested students on topics such as stroke, cardiac arrest, and special resuscitation situations.</li> <li>The course is video-based with instructor-led discussion and simulation. Students participate in, practice and complete various skills and learning stations.</li> <li>Ideal for learners who prefer group interaction and feedback from an instructor while learning skills.</li> </ul>	For healthcare providers – for example, EMS personnel, physician assistants, physicians, dentists, nurses, respiratory therapists and others who must have a credential (card) documenting successful completion of a CPR course.	Written exam and skills test	BLS for Healthcare Providers Course Completion Card	4 hours	Yes	Yes
BLS Healthcare Provider Online Part 1	Blended (Part 1 cognitive learning is completed online; Part 2 is skills practice session with AHA BLS instructor; and Part 3 is skills test with AHA BLS instructor)	<ul style="list-style-type: none"> <li>Adult rescue breathing</li> <li>Adult CPR/AED – 1 and 2 rescuers</li> <li>Adult relief of choking</li> <li>Child rescue breathing</li> <li>Child CPR</li> <li>Child relief of choking</li> <li>Infant rescue breathing and choking</li> </ul>	<ul style="list-style-type: none"> <li>Series of online modules covering adult, child and infant CPR sequences</li> <li>10 checkpoints to be completed</li> <li>21 optional review sections with 17 videos</li> <li>Establishes a standardized training program</li> <li>Self-paced learning, accessible anytime</li> <li>Provides flexible course design, accommodating a range of learning from basic checkpoint review to more extensive learning through optional sections</li> <li>Immediate answer feedback</li> <li>Reinforces learning and ensures competence</li> </ul>	For healthcare providers who have previously taken a BLS course and are seeking a flexible training option to obtain a new healthcare provider course certification card.	<ul style="list-style-type: none"> <li>Part 1 – Certificate of Completion provided after successful completion of online modules. Must present to complete skills test.</li> <li>Skills practice (Part 2) and successful skills test, Part 3, completes course certification</li> </ul>	BLS for Healthcare Providers Course Completion Card	90 minutes to complete Part 1.  Additional time required for skills practice session (Part 2) and skills test (Part 3).	Yes	No

## Emergency Cardiovascular Care Course Matrix

### Healthcare Professionals

Course	Delivery Format	Content / Modules	Features & Benefits	Audience	Written Exam / Skills Session	Card Type / AHA Certification	Estimated Time	CME / CE Credit	Offered in Spanish
Advanced Cardiovascular Life Support (ACLS)	Traditional	<ul style="list-style-type: none"> <li>Defibrillation</li> <li>Airway management</li> <li>Rhythm recognition</li> <li>IV access</li> <li>Use of medications</li> <li>Cardioversion</li> <li>Transcutaneous pacing</li> <li>1-rescuer CPR, AED</li> <li>Effective resuscitation team dynamics</li> </ul>	<p>Healthcare providers will enhance their skills in the treatment of the adult victim of a cardiac arrest or other cardiopulmonary emergencies.</p> <p>ACLS emphasizes the importance of basic life support CPR to patient survival; the integration of effective basic life support with advanced cardiovascular life support interventions; and the importance of effective team interaction and communication during resuscitation.</p> <p>Students engage in simulated clinical scenarios that encourage active, hands-on participation through learning stations where students will practice essential skills individually, as part of a team, and as team leader. Realistic simulations reinforce the following key concepts: proficiency in basic life support care; recognizing and initiating early management of peri-arrest conditions; managing cardiac arrest; identifying and treating ischemic chest pain and acute coronary syndromes; recognizing other life-threatening clinical situations (such as stroke) and providing initial care; ACLS algorithms; and effective resuscitation team dynamics.</p>	For emergency, intensive care, or critical care healthcare providers such as physicians, nurses, paramedics, respiratory therapists, and other professionals who may need to respond to a cardiovascular emergency.	Written exam and skills test	ACLS Provider Course Completion Card	(w/ 6:1 student: instructor ratio)  13.5 hours, including breaks	No	Summer 2008
ACLS EP	Traditional	<ul style="list-style-type: none"> <li>Expands on the core ACLS course with the 5 quadrads approach</li> <li>Special resuscitation emergencies (eg, drowning)</li> <li>Toxicology emergencies</li> <li>Metabolic emergencies</li> <li>Deeper knowledge for understanding and treating ACS patients</li> </ul>	The course provides a stimulus for expert clinicians and scientists to identify and discuss resuscitation in special circumstances.	Professionals, clinicians, and scientists who must respond to cardiovascular emergencies and special resuscitation situations in the workplace. For seasoned ACLS providers who wish to renew their provider status.	Written exam and skills test	ACLS EP Course Completion Card	9 -10 hours	No	No

Course	Delivery Format	Content / Modules	Features & Benefits	Audience	Written Exam / Skills Session	Card Type / AHA Certification	Estimated Time	CME / CE Credit	Offered in Spanish
ECG Pharmacology	Traditional (Instructor and slide presentation)	<p><u>ECG</u></p> <ul style="list-style-type: none"> <li>•Heart anatomy</li> <li>•Basic electrophysiology</li> <li>•Normal ECG measurements</li> <li>•Basic arrhythmias</li> </ul> <p><u>Pharmacology</u></p> <ul style="list-style-type: none"> <li>•Basic ACLS drugs and usage</li> <li>•Drugs, doses and routes of administration during cardiovascular emergencies</li> <li>•Integrating basic drug pharmacology into ACLS algorithms</li> </ul>	<ul style="list-style-type: none"> <li>•Two modules via slide presentations – one each for ECG and Pharmacology – which can be taught together or separately</li> <li>•Modular format for tailoring on either skill set or both together, depending on students' needs</li> <li>•Open to any Instructor to teach with no requirement to be affiliated with an American Heart Association Training Center</li> <li>•Enhances ECG recognition skills competency important to ACLS certification</li> <li>•Improves knowledge and more effective use of drugs during peri- or cardiac arrest</li> <li>•Improves student success in achieving ACLS certification</li> <li>•Strengthens ACLS algorithms competency</li> <li>•Only course in market focused on this critical knowledge</li> </ul>	For a variety of healthcare providers, including physicians, nurses, paramedics, residents, respiratory therapists, nurse practitioners, physician assistants, clinical pharmacists and ECG technicians.	No	ECG Course Completion Certificate	3.5 hours for ECG module 2.75 hours for Pharmacology module 6.25 for both modules	No	No

## Emergency Cardiovascular Care Course Matrix

### Healthcare Professionals

Course	Delivery Format	Content / Modules	Features & Benefits	Audience	Written Exam / Skills Session	Card Type / AHA Certification	Estimated Time	CME / CE Credit	Offered in Spanish
Pediatric Advanced Life Support (PALS)	Traditional	<ul style="list-style-type: none"> <li>▪ Recognition and treatment of infants and children at risk for cardio-pulmonary arrest</li> <li>▪ The systematic approach to pediatric assessment</li> <li>▪ Effective respiratory management</li> <li>▪ Defibrillation and synchronized cardioversion</li> <li>▪ Intraosseous access and fluid bolus administration</li> <li>▪ Effective resuscitation team dynamics</li> </ul>	<p>Designed to aid the pediatric healthcare provider in developing the knowledge and skills necessary to efficiently and effectively manage critically ill infants and children, resulting in improved outcomes.</p>	<p>For pediatricians, emergency physicians, family physicians, physician assistants, nurses, nurse practitioners, paramedics, respiratory therapists, and other healthcare providers who initiate and direct advanced life support in pediatric emergencies.</p>	Written exam and skills test	PALS Provider Course Completion Card	14 hours	No	Fall 2008
Pediatric Emergency Assessment, Recognition and Stabilization (PEARS)	Traditional	<p>Help providers recognize cardio-pulmonary distress symptoms of pediatric victims, and thus begin stabilization prior to arrest.</p> <p>Key topics covered:</p> <ul style="list-style-type: none"> <li>▪ Pediatric assessment</li> <li>▪ Respiratory compromise and arrest recognition and management</li> <li>▪ Circulatory compromise and arrest recognition and management</li> <li>▪ Shock recognition and management</li> <li>▪ Resuscitation team concept</li> </ul>	<p>This course addresses a gap in the number of healthcare providers who see pediatric patients, and do not require the advanced skills of PALS.</p> <p>The main focus of PEARS is prevention, and specifically, the assessment, recognition and stabilization of pediatric victims at risk of severe cardiopulmonary distress. Through unique learning tools, such as video-based simulation, providers can see and hear critically ill children with whom they do not typically come in contact, equipping them to recognize the symptoms of pediatric victims, and thus begin stabilization prior to arrest.</p> <p>The course is video-based with instructor-led discussion and simulation. Students participate in, practice and complete various skills and learning stations.</p>	<p>For any healthcare provider who might encounter pediatric patients in their profession.</p> <p>Course is <b>not</b> intended for those staff credentialed for advanced pediatric skills that <b>routinely</b> provide pediatric care.</p>	Video-based written exam and skills test	PEARS Course Completion Card	7 hours	No	No

## Emergency Cardiovascular Care Course Matrix

Course	Delivery Format	Content / Modules	Features & Benefits	Audience	Written Exam / Skills Session	Card Type / AHA Certification	Estimated Time	CME / CE Credit	Offered in Spanish
Pediatric Intraosseous Access	Traditional (Instructor and Video)	<ul style="list-style-type: none"> <li>Sites for IO infusion</li> <li>Indications for IO access</li> <li>Proper technique for placing an IO needle</li> <li>Appropriate needle placement and immobilization</li> <li>Complications associated with the technique</li> <li>Removal of the device</li> </ul>	<p>The video is designed to provide consistent information on the indications, methods, and complications of the IO procedure. After practicing the IO insertion technique in the Vascular Access Skills Station, participants will be prepared to perform this procedure on patients.</p> <p>Offers content for HCP instructors responsible for training on the IO skill and/or instructors of the PALS Course as a part of a core skills practice station to achieve consistency in the message delivered to learners, enhancing the safety and efficacy of IO access provided to children.</p>	For healthcare providers who provide pediatric advanced life support, including paramedics, nurses, nurse practitioners, physician assistants, and physicians.	Skills practice with AHA Instructor	None	10 minute video, plus skills practice at Vascular Access Skills Station	No	No
Pediatric Status Epilepticus	Traditional (Instructor and Video)	Three cases are presented that lead participants through the assessment and initial treatment of this pediatric emergency.	<p>Healthcare providers learn to recognize the problem, appropriately assess Status Epilepticus, describe initial treatment, and avoid overly aggressive therapies that have potential for harm.</p> <p>This interactive case-based module is designed for use in a small group format and may be presented as an additional module of the PALS course or as an independent offering.</p>	For any healthcare worker who provides pediatric advanced life support, including paramedics, nurses, respiratory therapists, nurse practitioners, physician assistants and physicians.	None	None	1 hour	No	No
Coping With the Death of a Child	Self-Directed Learning (booklet and CD/video based)	Assist all healthcare providers to better deal emotionally with an unsuccessful outcome of pediatric resuscitation.	Provides needed information for healthcare providers to help both the parents AND the providers in dealing with unsuccessful resuscitation and death immediately thereafter. Helps guide providers to self awareness and dealing with their individual emotions.	For any healthcare worker who provides pediatric advanced life support, including paramedics, nurses, respiratory therapists, nurse practitioners, physician assistants and physicians.	Written test	After students submit and CE application and test are process, certification is issued directly to students.	1 hour	Yes	No
Catastrophic Illnesses in Children	Traditional (Instructor and PowerPoint case study)	Review and study clues for the diagnosis of potentially catastrophic illnesses in children presenting with common chief complaints.	<p>Case study to aid in diagnosis of children with catastrophic illnesses. Cases were chosen based on the lethality of the underlying condition, the ease of being misled by history and physical examination, and the ability to make the correct diagnosis with relatively simple interventions.</p> <p>An interactive case-based module to be taught in a small group format, this module can be used either as a freestanding or as an additional part of the PALS Course.</p>	For the experienced PALS provider, medical students, internists, or emergency medicine physicians	None	None	1 hour	No	No
